

Not much staining in DR

Cerebellum staining seems to be in purkinje cells

The staining in layer 4 of the cortex is unclear in nature (cell? Projection?)

Faint staining in prefrontal cortex

Fig. 2 DR3-Cre x ROSA-RGL

LacZ Staining (unsure of nature, cellular or axonal) in Dorsal Raphe, purkinje cells of the cerebellum, Layer 4 of somatosensory cortex, singulate cortex(Cgl), paraventricular thalamic nucleus(PV), medial and lateral habenula(M and L H) and reuniens thalamic nucleus(Rh).
